**Water Environment Research Foundation (WERF) Report:  
Study on Reactivation and Regrowth of Fecal Coliform**

An important research report was recently released by WERF that may be of interest to your agency. The report details the results of a first phase of a research effort regarding reactivation and regrowth of fecal coliform in centrifuge dewatered sludges. The report on this initial research was released June 5<sup>th</sup> and can be obtained from the WERF website at [www.WERF.org](http://www.WERF.org). The WERF project number for this report is 03-CTS-13T. Follow-up research is currently underway with results anticipated to be available to wastewater treatment facilities by the end of August 2006.

You will find information summaries prepared by WEF, WERF, and USEPA on the SCAP website at [www.scap1.org/reference/biosolids](http://www.scap1.org/reference/biosolids). Please use these to gain additional information about the report and address any related media inquiries.
